

Automatic Geometric Correction of Landsat-5, Thematic Mapper 15-05-1992

-  Puntos Test
-  Puntos de Control

Reference System UTM zone 31
Northern Hemisphere with
ETRS89 datum
Band Combination: R,G,B

The cartography conveys the geometric correction of the Landsat-5, Thematic Mapper of 7 bands with a nominal resolution of 120 to 30 meters. The correction of the image was conducted through the automatic placement of check points, control points, and tie points, sourced from the application CorGeo2 from Miramon.
